Summary

Full-stack developer with hands-on experience building production-ready MERN stack applications featuring role-based authentication, RESTful APIs, and cloud deployment. Proficient in **React.js**, **Next.js**, **Node.js**, **MongoDB**, and **TypeScript**, with a strong foundation in scalable architecture, animation-driven interfaces, and responsive UI design. Passionate about writing clean, maintainable code and delivering end-to-end web solutions. Seeking a junior or associate software developer role to contribute to impactful, real-world products within a collaborative engineering team.

Education

PSG College of Technology <i>Master of Computer Applications (MCA)</i>	Aug. 2025 – Present Coimbatore, India
PSG College of Arts and Science <i>Bachelor of Science in Computer Science</i>	Aug. 2021 – May 2024 Coimbatore, India
PSG College of Arts and Science <i>Post Graduate Diploma in Human Resource Management</i>	Aug. 2024 – May 2025 Coimbatore, India

Projects

Dual-Theme Portfolio <i>Next.js 15, TypeScript, Tailwind CSS v4, Framer Motion, GSAP</i>	🔗 GitHub 🌐 Live
- Built a desktop-style interactive portfolio with two fully themed modes – a glassmorphic macOS canvas and a retro Windows 95 pixel-art interface, with a theme toggle that persists via localStorage - Engineered a draggable macOS-style window manager using a global WindowContext to handle z-index stacking, focus, minimize, and maximize across multiple app windows including Projects, Skills, Experience, and Contact - Created an interactive hero canvas with a GSAP-driven staggered reveal sequence, a gooey SVG cursor mask revealing the alternate theme, and full prefers-reduced-motion accessibility support - Integrated a server-side Spotify Web API widget with refresh-token authentication to display currently playing tracks with live progress, and built an in-app resume viewer using react-pdf with lazy loading	
SFX Hostels <i>React, Node.js, Express.js, MongoDB, JWT, Razorpay</i>	🔗 GitHub 🌐 Live
- Designed and developed a full-stack RESTful API-driven hostel management platform with role-based access control for Admins, Staff, and Residents; handled room allocation, billing, and maintenance workflows end-to-end - Implemented JWT authentication with bcrypt for secure session management; integrated Razorpay payment gateway for online invoice payments and Nodemailer for transactional email notifications - Architected a protected Admin dashboard with occupancy analytics and invoice generation; deployed on Vercel and Render with Playwright end-to-end tests ensuring cross-browser compatibility	
Eventra <i>React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS</i>	🔗 GitHub 🌐 Live
- Built a full-stack event management system with three role-based portals – Students register and join teams, Coordinators manage attendance, and Admins handle event creation and analytics - Developed scalable RESTful APIs using Express.js with MongoDB Atlas for managing events, teams, and enrollments; implemented JWT-based authentication with role-level access control - Delivered a fully responsive, mobile-friendly UI using Tailwind CSS; version controlled with Git and deployed frontend on Vercel and backend on Render	

Certifications

Full Stack Development <i>HCL GUVI</i>	May 2026
Database Management System <i>NPTEL Credential: NPTEL23CS79S25340620</i>	Sep 2023

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, TanStack Query, Zustand, Tailwind CSS, Framer Motion, GSAP
Databases: MongoDB, PostgreSQL, MySQL
Tools & Platforms: Git, GitHub, REST API, Postman, Figma, Vercel, Render, Netlify, Playwright
